A stable, healthy income - rain or shine!
Savills has partnered with Big60Million, a new type of community-benefit energy company created by BELECTRIC UK, to bring you a brand new concept in farm income diversification: solar farms designed to be popular with both neighbours and planning authorities.

Big60Million offers landlords not only premium land rents secure over 25–30 years, but also shared investment opportunities for local communities, in line with the government’s Community Energy Strategy. We deliver biodiversity enhancements and educational programs with local schools which, combined with the financial benefits, ensure that local communities become enthusiastic participants and supporters of these projects.

We have a proven track record of delivering sensitive planning applications capable of winning strong local support — in 2014, all the planning applications we submitted were approved first time.

As a landowner or land manager thinking about a large-scale solar installation, it is important you have access to the right resources and experience. As a trusted Savills partner, Big60Million provides exactly this.

Our solar farms are designed, constructed, operated and maintained by BELECTRIC UK, a world leading solar specialist with over 3,000 major solar installations — including the UK’s largest solar farm — and nearly 150 solar technology patents under its belt.

We’re targeting sites of 15 acres, on low-grade agricultural land anywhere in the country, preferably flat and well screened from nearby buildings and surrounding countryside.
